

KIPSOI EVANS KIPLIMO  
PO BOX 423  
ITEN

1st September 2015

Dear Sir / Madam,

I am Kipsoi Evans Kiplimo aged nineteenth years. I study at Kipsoen Boys High School in the fourth class now (Form four). Actually I would be sitting for my Kenya Certificate of Secondary Education this year starting on 15th September and ending on 5th November.

Therefore I am struggling in my academic and putting more effort on my academic to achieve my success and goals. I always do thorough revision because my National Examinations are nearer only two months only.

I look forward with determination and confidence to pass my examination and aiming to score high marks (mean grade) that would take me to a good university. Hardwork leads to success and therefore is the route to pass and gain knowledge.

My challenges that I undergo in my life are as follows and the major one are that my parents are unwilling to pay because my all needs concerning and equipping my education and these are like purchasing alamb using for reading at night time during holidays.

At home I have step sister and brother who had joined secondary level of education and also

Some of them got support from other people. This is a major challenge to my parents in acquiring for us revision books for using to do research in revision work.

In home my parents are faced with problems sometimes in providing for us our basic needs that satisfy our daily life such as food, shelter, clothing and other requirements that could accommodate us in our daily experience.

Sometimes, my parents could not be able to accommodate for me finance for purchasing shopping like soap, shoe polish, Colgate and many others that are the basic common one. This could be a challenge sometime it could be a major challenge and difficult for me because they are majorly needed.

In advance education is the key to success and therefore I need to put more effort in hardwork through my revision skills so that I can be able to pursue my education and achieve my goals and join a good university and get a good career of my choice.

I need my vision to determine my future to be brighter and able to participate in helping the needy people, aged people and also other people within and outside country.

Lastly, I would not forget to appreciate to thank you for your ability in supporting me to continue with <sup>my</sup> my academic. You are my parents and <sup>my</sup> my God could grant and bless you abundantly.

Yours faithfully,  
KIPSOI Evan Idi. Imani.
